

The direct air route to the Soviet Union

The Moscow Air Express is the only direct means of reaching the Soviet Union by air from England and other European Countries. The service will be run every weekday from the 3rd May to the 4th November. The route goes from Stockholm Airport via Gotland to Riga, the Capital of Latvia, which is reached in 2 ¼ hrs. From Riga the plane proceeds direct to the Russian frontier airport Velikije Luki, where lunch may be obtained, and after half-an-hour's stop there it leaves for its final destination Moscow. The plane lands in Moscow on the huge Central Aerodrome 7 hrs. after leaving Stockholm. From the Central Aerodrome it is 15 min. by car to the centre of Moscow.

Good air connections with the whole of Europe

From London, Paris, Amsterdam, Berlin and most of the other principal cities of Europe there are excellent connections by air with Stockholm several times a day. The aeroplane for Moscow leaves Stockholm early every weekday. Starting from Moscow you can fly to Copenhagen, Amsterdam and London — a distance of 3,000 km. (1,800 miles) — all in one day. From Moscow there are good connections by air and rail to Leningrad, the Crimea, Baku (1 ½ days), Teheran (3 days), the Manchukuo frontier station Manchouli (7 days), China and Japan (every Thurs. & Sun.).

Douglas DC-3 and Junkers Ju 52 aeroplanes

The Board of the International Airlines of the Soviet Union — subsidiary to the U.S.S.R. State Air Lines Aeroflot — cooperates in running the Moscow Air Express with twin-engined Douglas DC-3 machines with accommodation for 21 passengers, flown by the best pilots in the Soviet Union. ABA — Swedish Air Lines operate this route with aeroplanes of the triple-engined Junkers Ju 52 type, which are specially fitted to accommodate only 12 passengers in order to afford them the maximum degree of comfort. On the air routes to Stockholm from London, Paris, Berlin and other places ABA — Swedish Air Lines employ Douglas DC-3 aeroplanes.

For the 3rd year — 7 hrs. as against 5 days

For the third successive year the Moscow Air Express is being operated by Aeroflot and ABA — Swedish Air Lines in collaboration, and during the past years traffic has been maintained with exceptional regularity. By other means of travel it takes 3 days to reach Moscow from Stockholm, by the Moscow Air Express the journey is done in 7 hrs.

Visas

To have your passport visaed for the U.S.S.R. you should as early as possible ask the advice of your travel bureau or consult the nearest Intourist Office.
